

CELL DEBRIS (ALBUMIN) TIPS

Pour urine specimen into a clean jar.

View the specimen with a light source behind the jar.

If you can immediately see floating particles, it is a **4**.

If you can see floating particles only after viewing it for a bit, it is a **3**.

If you can only see floating particles with a magnifying glass, it is a **2**.

If you cannot see floating particles even with a magnifying glass, it is a **1**.

Make sure you have completed all parts of the test before discarding the urine.
