

Habanero Cancer Remedy

by Cancer Survivor William Kelley Eidem

Grate one habanero pepper each day, putting it on bread. Yes, you use the seeds. Grate two cloves of garlic each day, putting them on bread. 1-2 tablespoons of emulsified cod liver oil each day. TwinLabs makes some wonderfully flavored cod liver oil.

I used the cod liver oil because I was not losing any weight or dealing with fluid retention. If I had either of those conditions, I would have used evening primrose oil or borage oil instead of the emulsified cod liver oil.*

Smother the grated garlic and habanero peppers with real butter and eat it. No margarines of any type, including Smart Balance, etc.

If hot peppers didn't agree with me, then ginger is what I would use - and yes I trust the ginger just as much as the habanero to do the job.

That's it!

* The best way to determine which oil I would use can be determined easily, especially if there is pain. One way would be to drink a cup of black coffee with two boiled eggs. (boiled only.) If that made me feel worse, I'd use 1 or 2 tablespoons of emulsified cod liver oil. If the coffee and eggs made me feel better, I'd use 6,000 mgs of borage oil or evening primrose oil.

The potent active ingredients from the peppers and the garlic disperse quickly. So they must be grated each day, and eaten immediately.

You're probably thinking, whoa that's gotta be hot!

Yes, it is. And it will make you breathe deeply! That's a good thing, because heavy breathing pumps the lymph system. As you know, cancer cells often gather there.

What I did was put the habaneros and the garlic on one side of the bread and folded it over. Plus, it's handy to have another half slice at the ready to cut the burning sensation in my mouth.

So let yourself breathe deeply for a minute or two and then eat the extra half slice of bread.

Let me say a word or two about the bread. I used Ezekiel spouted bread. You can get it in the freezer section of health food stores and at Publix or Whole Foods or Sprouts.

How well did this recipe of mine work?

All of my lesions went away in about four or five days. I had a dozen or more, so that was pretty good, if you ask me.

Since I wasn't fond of the peppers and garlic, I quit after the fifth or sixth day.

A few days later, three or four lesions came back. So I went back on the three part recipe. The lesions vanished once again in about four days.

After that, I continued to take the emulsified cod liver oil for about six months. On occasion I take another bottle of the cod liver oil.

This episode of my raging cancer took place around October of 1998 as best that I can recall. No lesion has returned since that time.

It's working for others, too!

Here's a comment given below from a woman who has tried my cure for two weeks:

"I wanted to make sure and report back to you after having followed your protocol for two weeks. I am SO PLEASED to say that the (stabbing, knife piercing) pains in my right breast are completely gone, and so is the lump!"

When you look at the possibility of being cancer free in two weeks - maybe sooner or maybe longer - you have nothing to lose and everything to gain. This works...it really works.

You can pick up 2/3's of your cure at the grocery store.

In the first part of this two-part article I mentioned that researchers from UCLA used peppers to shrink tumors 80%. Here's something to keep in mind about that.

The researchers don't have a patent on peppers or garlic. The peppers are available at many grocery stores. Garlic is available at every grocery store in the United States, and probably the world over.

The point I'm making is that you have access to these ingredients, and you don't need a lab coat or a university degree to buy them.

Cancer Test

Here's the info on the more sophisticated HCGH test:

The sophisticated test was developed by a Philippine Dr. Manuel D. Navarro in the late 1950's! His son, Dr. Efren Navarro, continues to analyze the test results. The test is called the "HCG Urine Immunoassay."

This HCG test can find cancer 12 to 27 months before other kinds of testing depending on the type of cancer.

When I checked into this two years ago, the test cost about \$50. To find out more, call Erlinda Suarez at (847) 359-3634.

The address is 631 Peregrine Dr., Palatine, IL 60067.

The turnaround time for the test is about 10 days.
